Narrative Explanation, if needed

Annual inspection performed today, I arrived on site at 10:45am, and kennel owner Barb accompanied me today. Kennel is clean and odor free today, ambient temperature is within range. Previous inspection on 6-15-16, noted inadequacies in odor ventilation, that is much improved today; also owner was not maintaining the sign out log, that has been done since my previous inspection; also records were lacking for one boarder "Renzo".

* Today's inspection is noted on attached narrative.

Narrative Explanation, continued

Today's Inspection}

* Odor/Ventilation is much improved today, it is likely the best it has been since I have inspected here. Owner did mention that her 17 year old dog recently passed, and he had alot of incontinent issues- so that was likely the cause of the long term odor. We did discuss her cleaning today: Barb removes waste as needed throughout the day, and immediately outside. She cleans accidents with detergent like Odoban, and washes bowls, towels, and linens daily (large beds are done weekly or when soiled). She sanitizes all floors, walls, surfaces, and removable crates weekly with a bleach solution.

* Long term boarders- Barb has two long term boarders here today that have been with her for 6 months, Honey and Bentley. We discussed the care of her long term boarders and she advises they are leash walked several times a day, they do have access to other animals, and are supplied toys/other enrichment opportunities.

* (0103)- Records are not available for two English Bulldog boarders, named Honey & Bentley, they have been here for 6 months according to Barb, and their owner has not brought their vaccine or veterinary records. Barb does have the owner information, animal description, and recent treatment/medication logs on site. I advised Barb it was her responsibility to obtain all required records. Because these records are not on site, I contacted the animals vet, Academy Animal Hospital in Laurinburg to verify that they are up to date on the state mandated rabies vaccination. I spoke with Pam, and she advised that Honey is not up to date on her rabies, and that expired July 2016. She also advised that both dogs will be due a Bordetella vaccine on 12-23-16, they are both up to date on their distemper/parvo vaccinations.

* (0210-d)- Compliance w/ NC GS130A (Rabies inoculation), is not acceptable today - due to Honey's non-vaccinated status discovered during a random records inspection. After confirming with Academy Animal Hospital, I also called Honey's owner: Missy Locklear and left her a voicemail letting her know that Honey needed a vaccine to continue to board here. She did call me back, and I explained NC rabies inoculation laws. She did agree to take both dogs in to the vet by this afternoon, or tomorrow morning at the latest to have their vaccines updated. Once I hung up with their owners, I told Barb that she had 24 hours to ensure the dog was vaccinated or removed for her kennel, and I expected a call from her by tomorrow afternoon. I also took this opportunity to educate Barb on NC statue for rabies vaccinations, what will happen if Honey bites someone, or comes in to contact with an animal known to carry rabies. I believe Barb is clearly understanding of these issues now, as well as my firm stance on all animals having proof, on site, of up to date vaccines.
